DETAILED ACTION

Claim Objections

Claims 1-12 are objected to because of the following informalities: claims 1 and 6 do not use the term comprising or consisting of. Without either of these terms it is difficult to determine the exact meets and bounds of the claims. Appropriate correction is required. For the examination below it is assumed that the preparation refers to the reservoir, the backing and the electrodes.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al (USPN 6,490,482). Mori discloses a reservoir (43), a cup backing (44) and comb electrodes (22). See Figures 2 and 4B. The electrodes come in direct contact with the patient. During use the compound is directly administered to the patient. The backing has a flange with an adhesive (41). See figure 4A. The reservoir may be made from agar. See 9:29-34. The membrane that holds the electrodes is in contact with the flange. See figure 4B.
